**INTERNATIONAL
SUSTAINABILITY CAMPUS
near
BUDAPEST**

**a replicable model of
societal reconstruction for
securing a future of**

Peaceful Systemic Sustainability

Why do it?

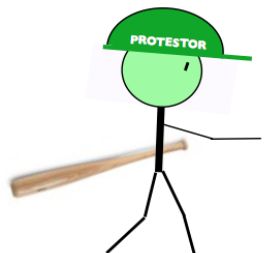

What to do?

How to do it?

Who will do it?

Where?

When?

2b

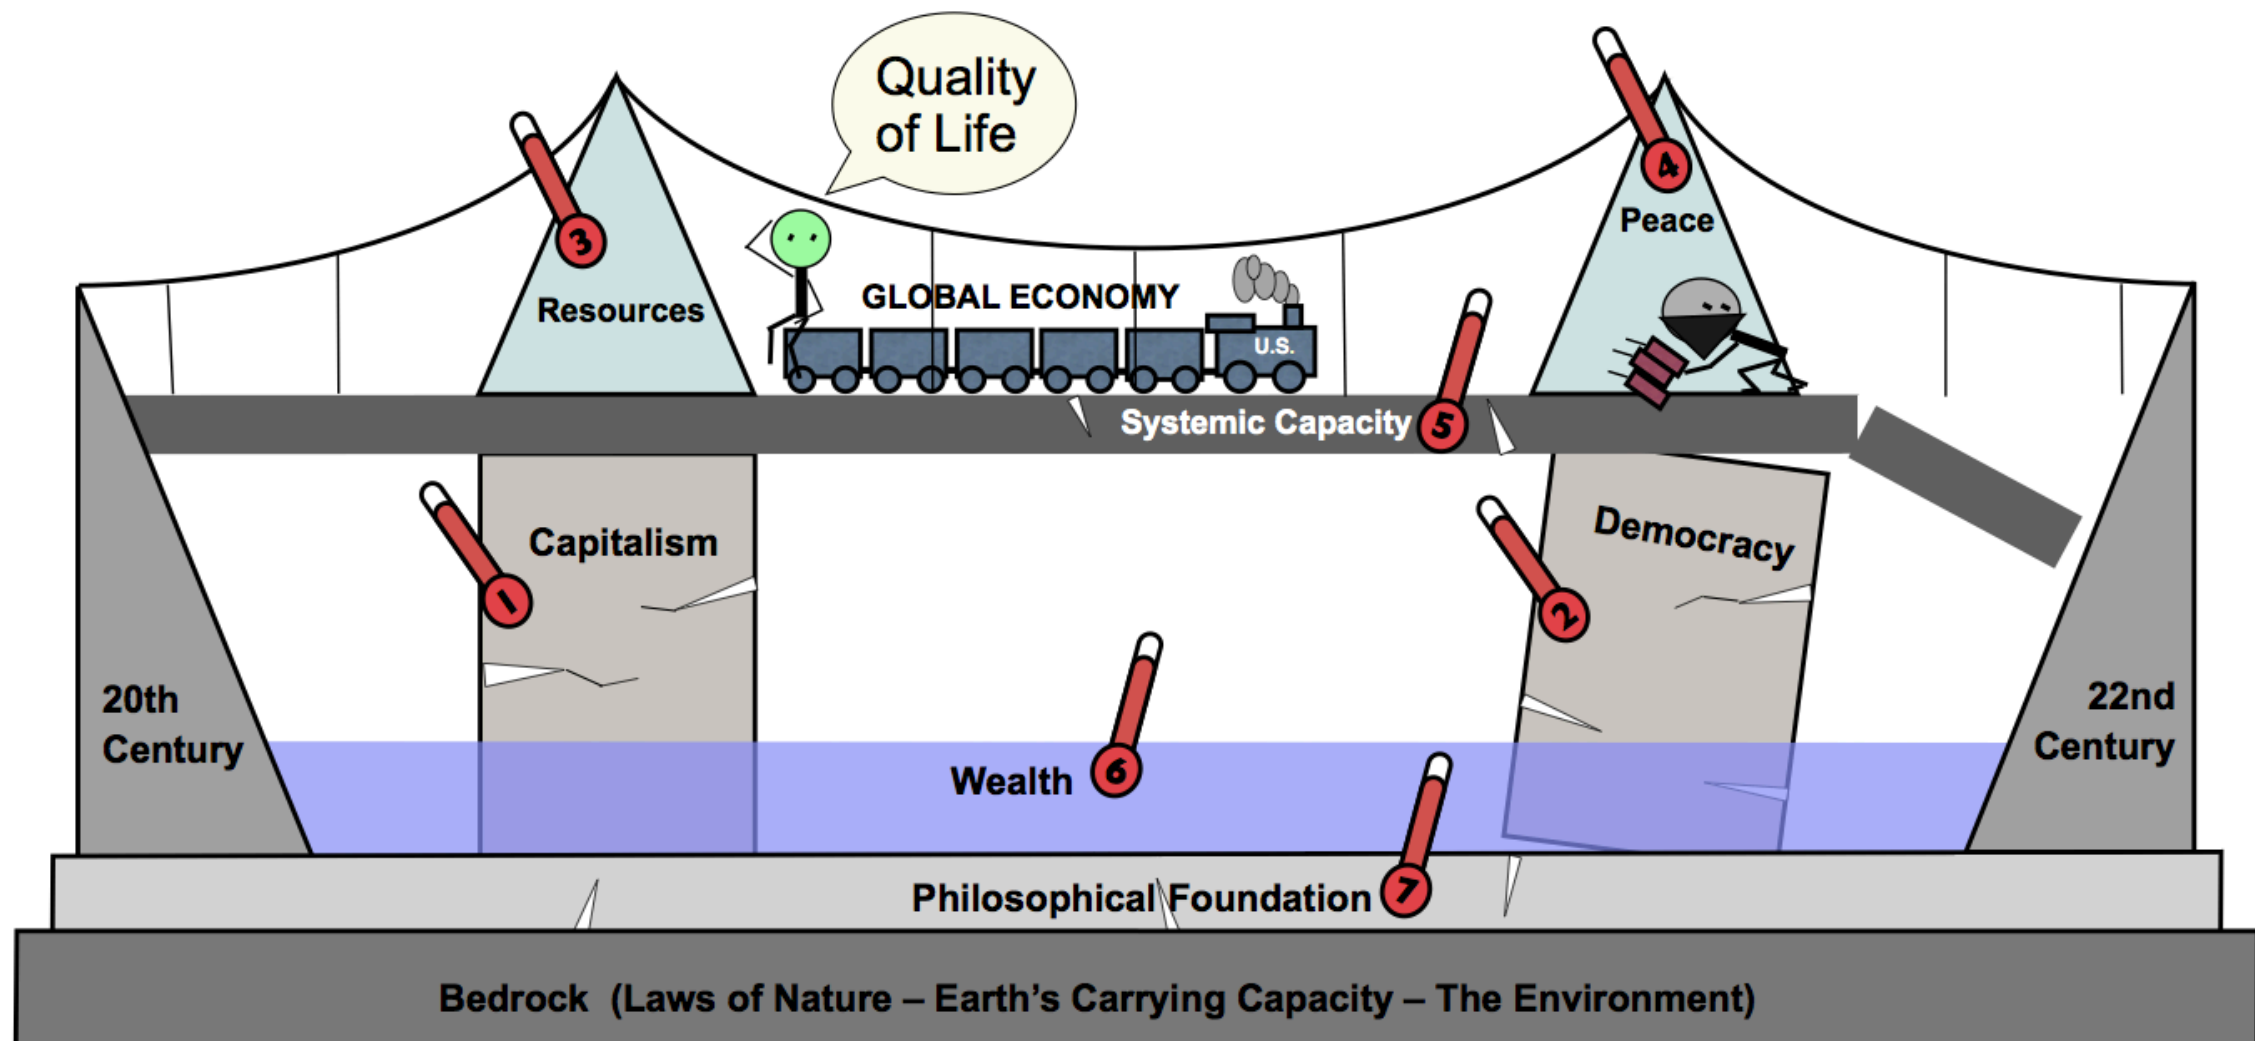

WHY

do it?

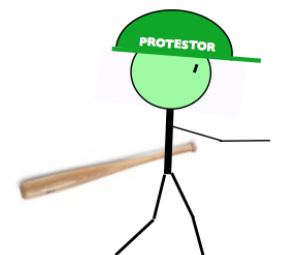

Because your Bridge to the future is about to collapse

3a

All critical parts are highly stressed

3b

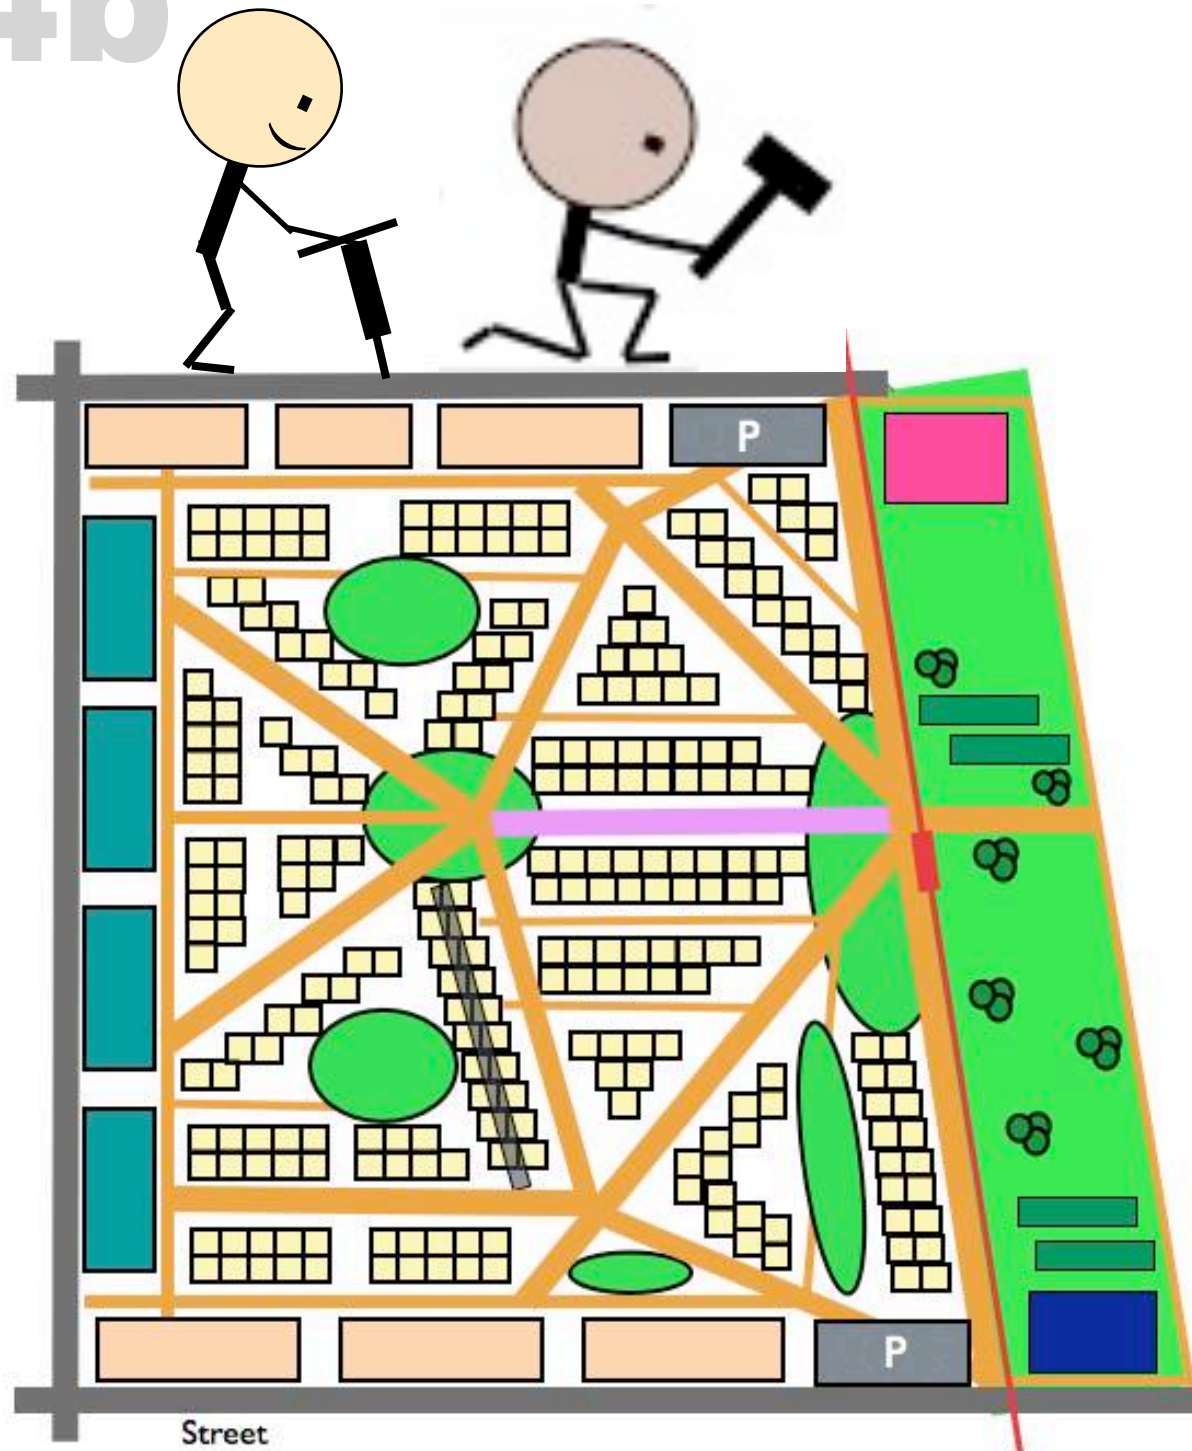

WHAT
to do?

**Build a better Bridge
to your future!**

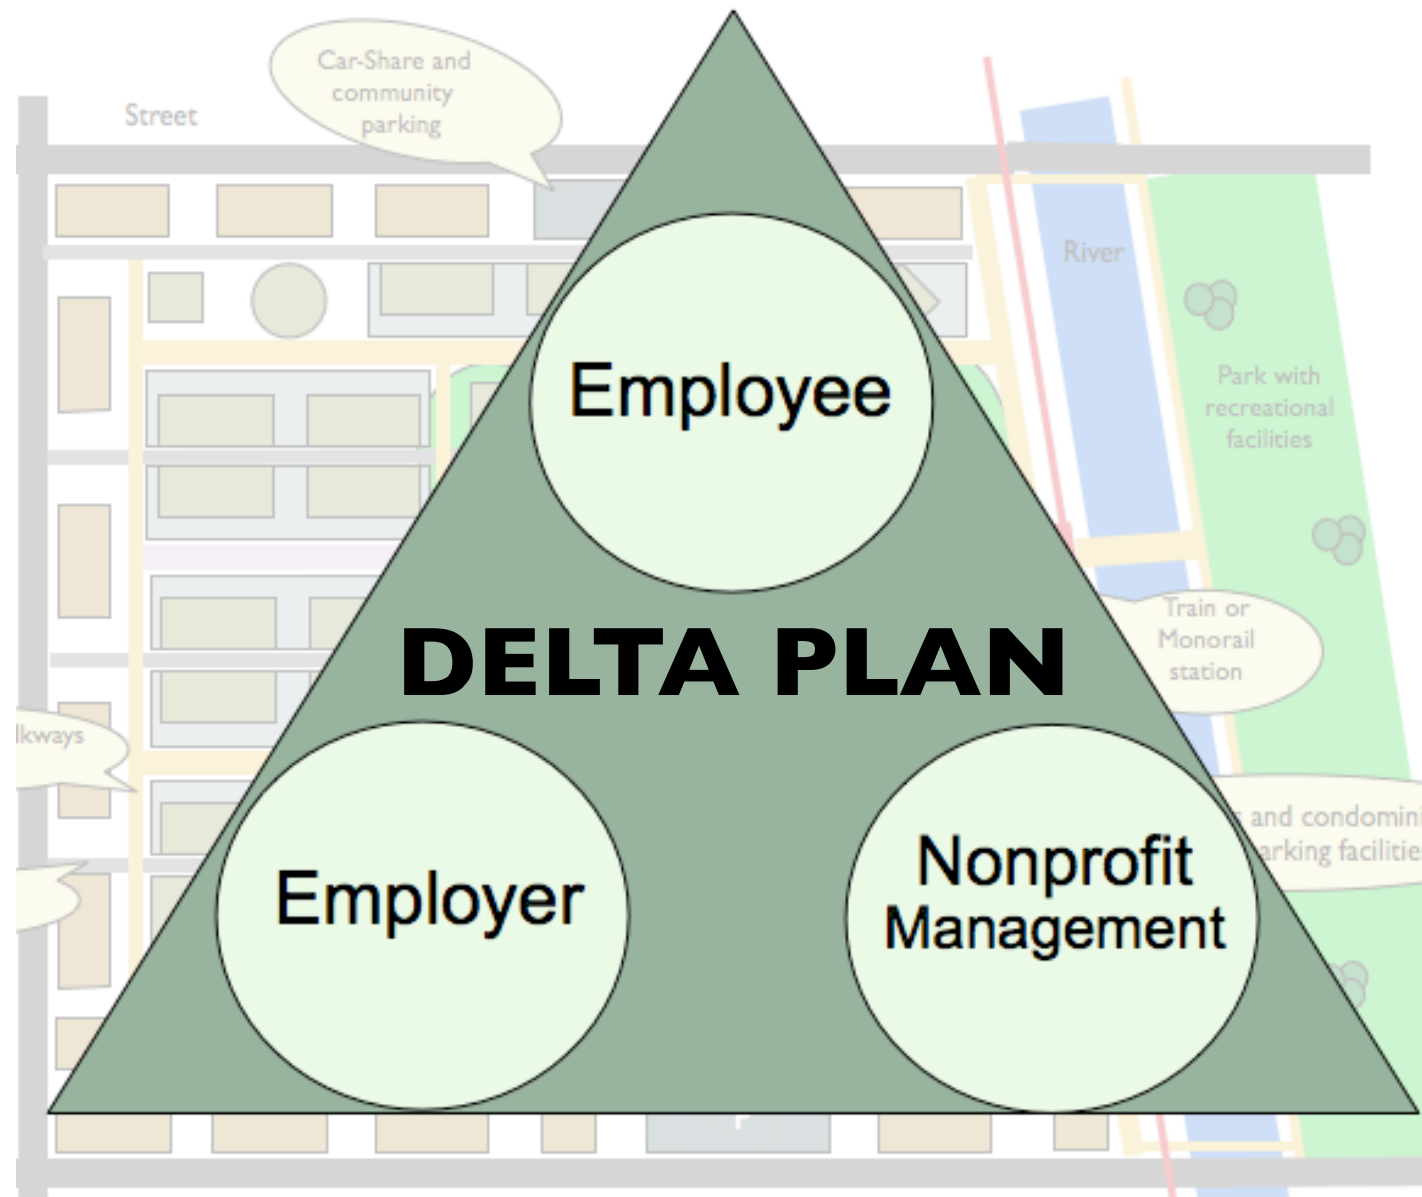

4b

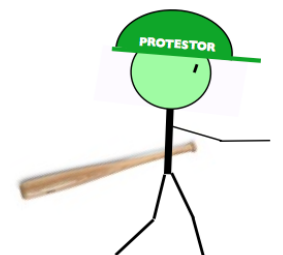

Construct
live/work/walk,
healthy,
sustainable,
compact urban
communities ...

**... with hybrid local economies
and social contracts to provide
security and quality of life.**

5b

A B C of the Holigent Delta Plan

A Variable Commitment Allocation Agreement

The Holigent Delta Plan is a three-way agreement between participating employers, their participating employee-residents of the “Holigent Village” and a nonprofit developer/management organization. The Holigent arrangement helps generate and retain local value and wealth, providing a “firewall” to protect participating communities against the unpredictability of the general/global economies even during recessionary times.

With the Delta Plan, the nonprofit management organization is able to underwrite business continuity, job and housing security, and quality of life for all occupants of a Holigent community.

Three general scenarios (A,B,C) illustrate the key aspects of the hybrid economic arrangement.

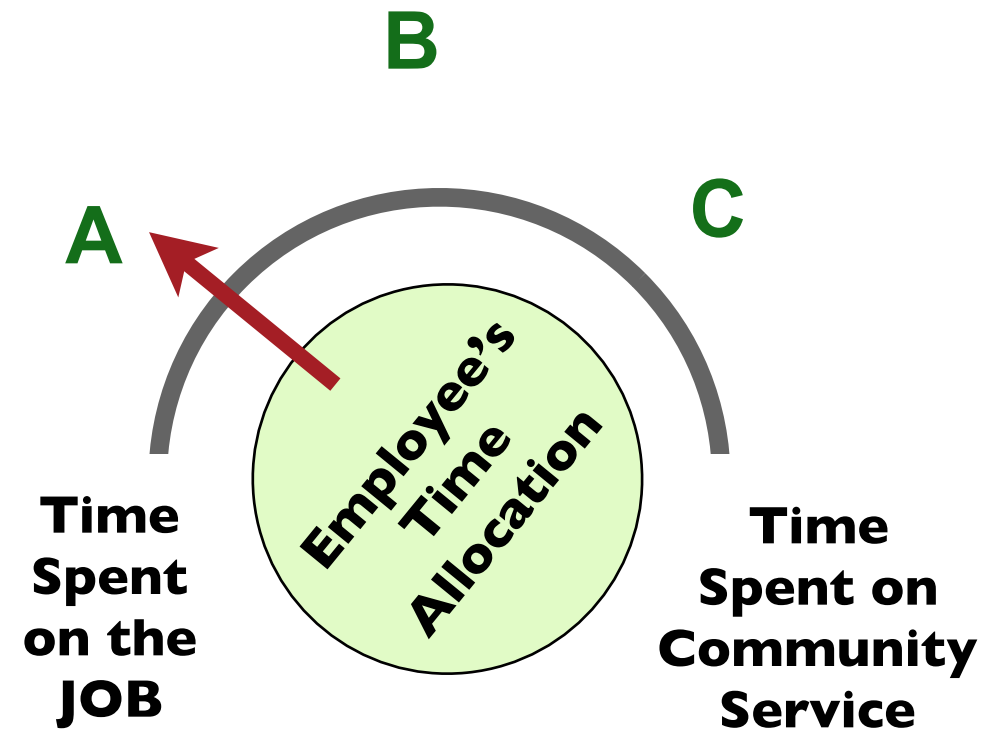

<http://>

6b

Plan A Normal Conditions

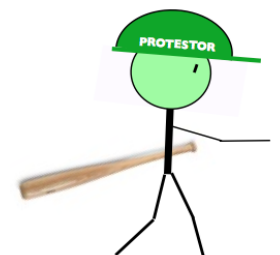

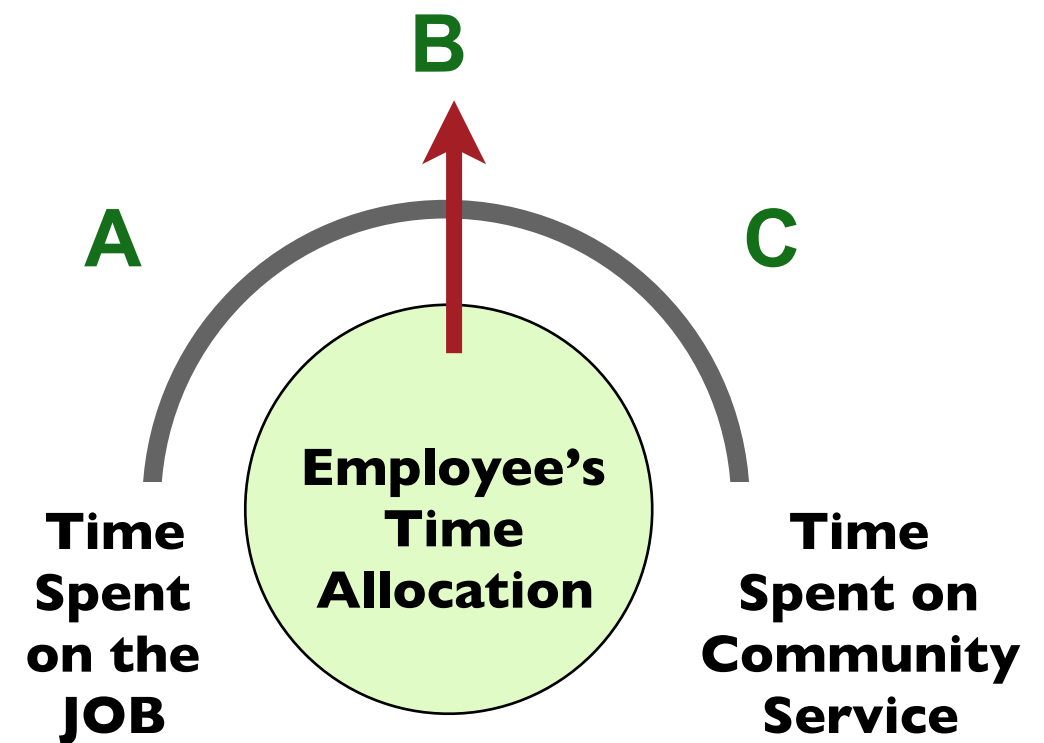

Under normal conditions an employee-resident's time allocations are balanced between employment and community service according to their basic agreement. Participating employee-residents are under an individual or collective Delta Plan. In addition to their regular jobs, all employee-residents work a few hours per month in community service – earning Community Credit (C-Credit) and pay a portion of their rent with C-credit.

Plan B Variable Conditions

During moderate economic downturns, affected employees' commitments would be varied according to a negotiated or pre-arranged scale. Affected companies would reduce some or all employees' work-hours in accord with agreements.

Affected employees would work more hours in community service and pay a larger portion of their rent with earned C-credit.

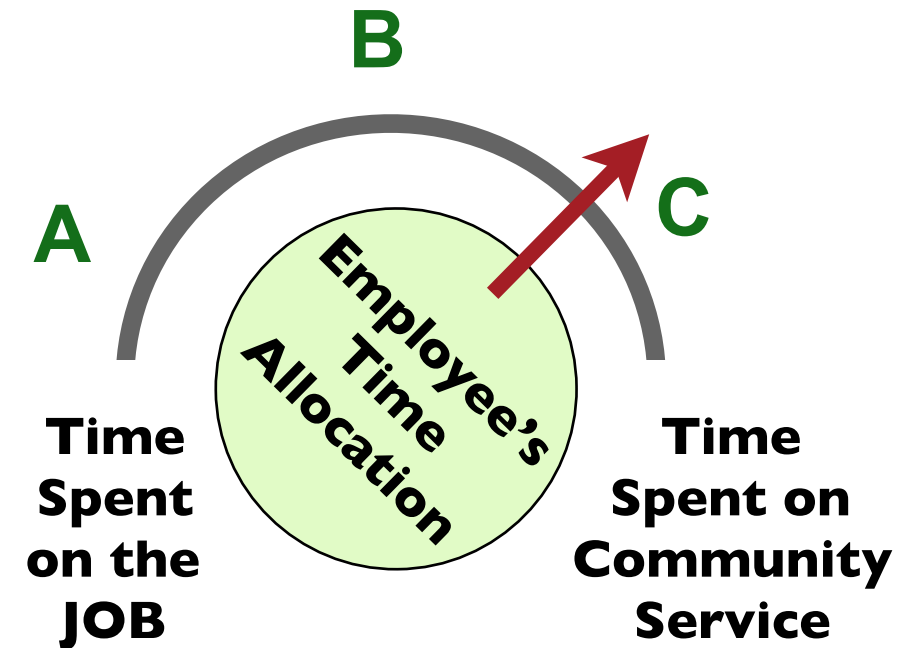

7b

Plan C Dormant Conditions

During severe economic hard times, an affected company would go into a dormant state rather than shut down. Their employee-residents would go on unpaid furlough rather than be laid off and would be recalled when work is available

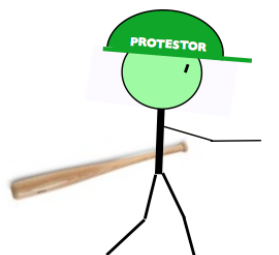

again. Increased community service allows furloughed employee-residents to retain their apartments and pay most or all their rent with earned C-credit. Participating employers, in order to avoid permanent shutdown, must be debt-free, insured, subsidized, or otherwise able to reorganize or freeze obligations to be covered for the dormant period. This plan would preserve a company's physical, business, and workforce assets as well as its employee-residents' workplace, housing and essential quality of life.

HOW

to do it?

holigent.

8b

Reconstruct society according to Nature's building code:

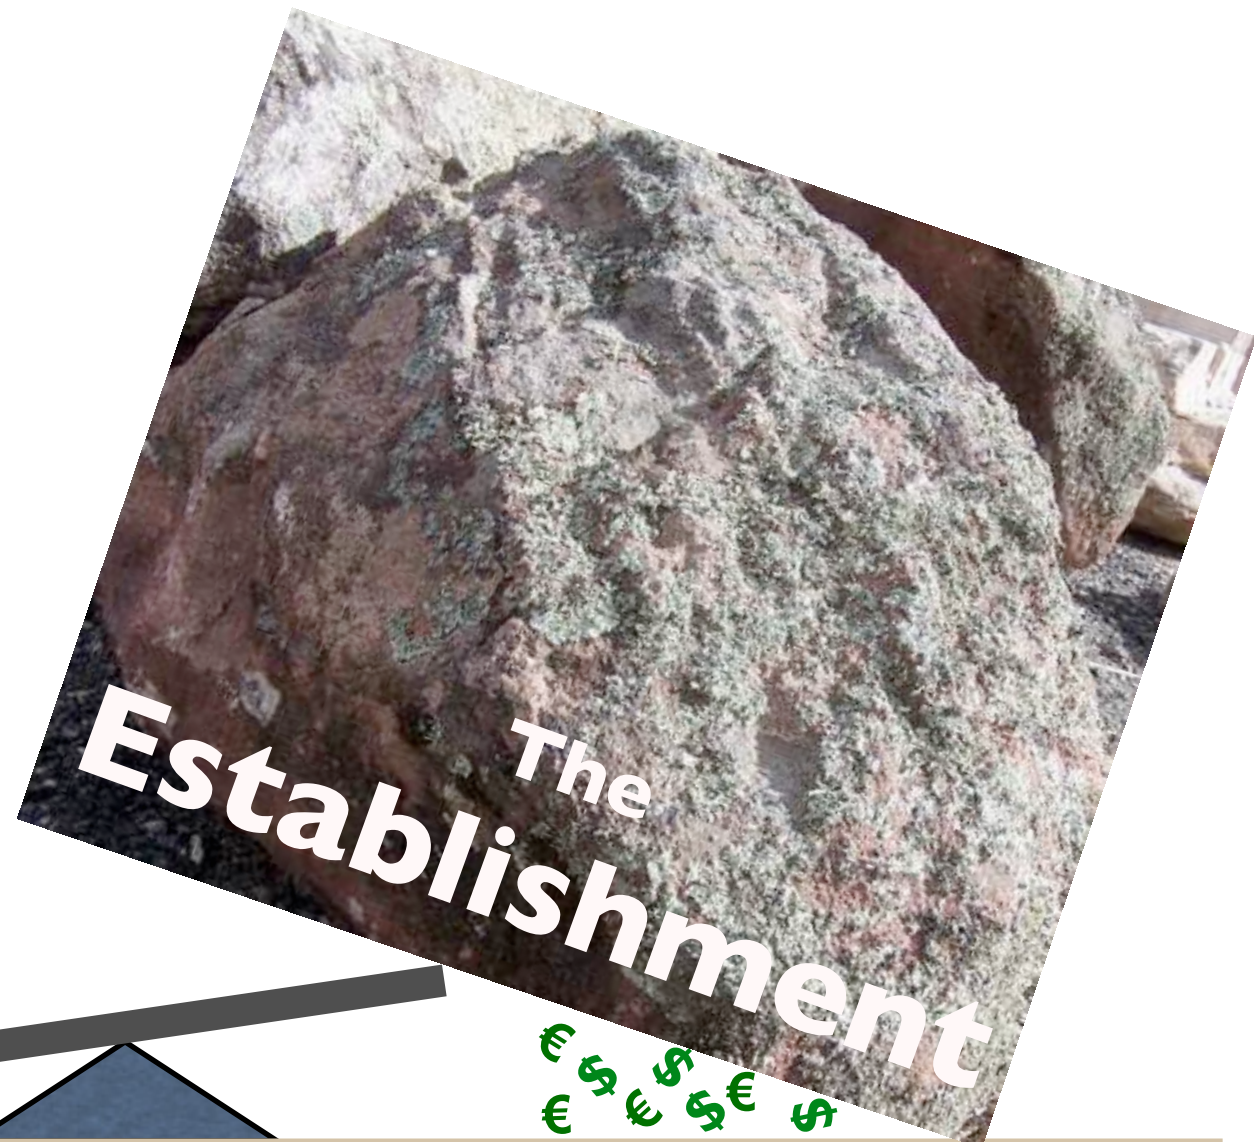

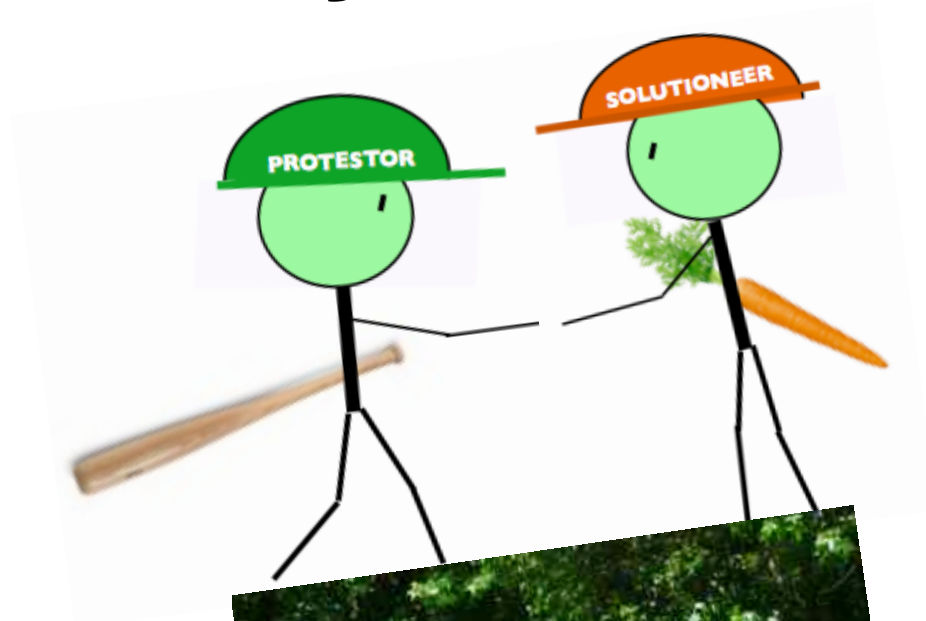

***Doing the essential most with the
least of resources without waste***

**This big job needs
tools such as the
lever and the vise.**

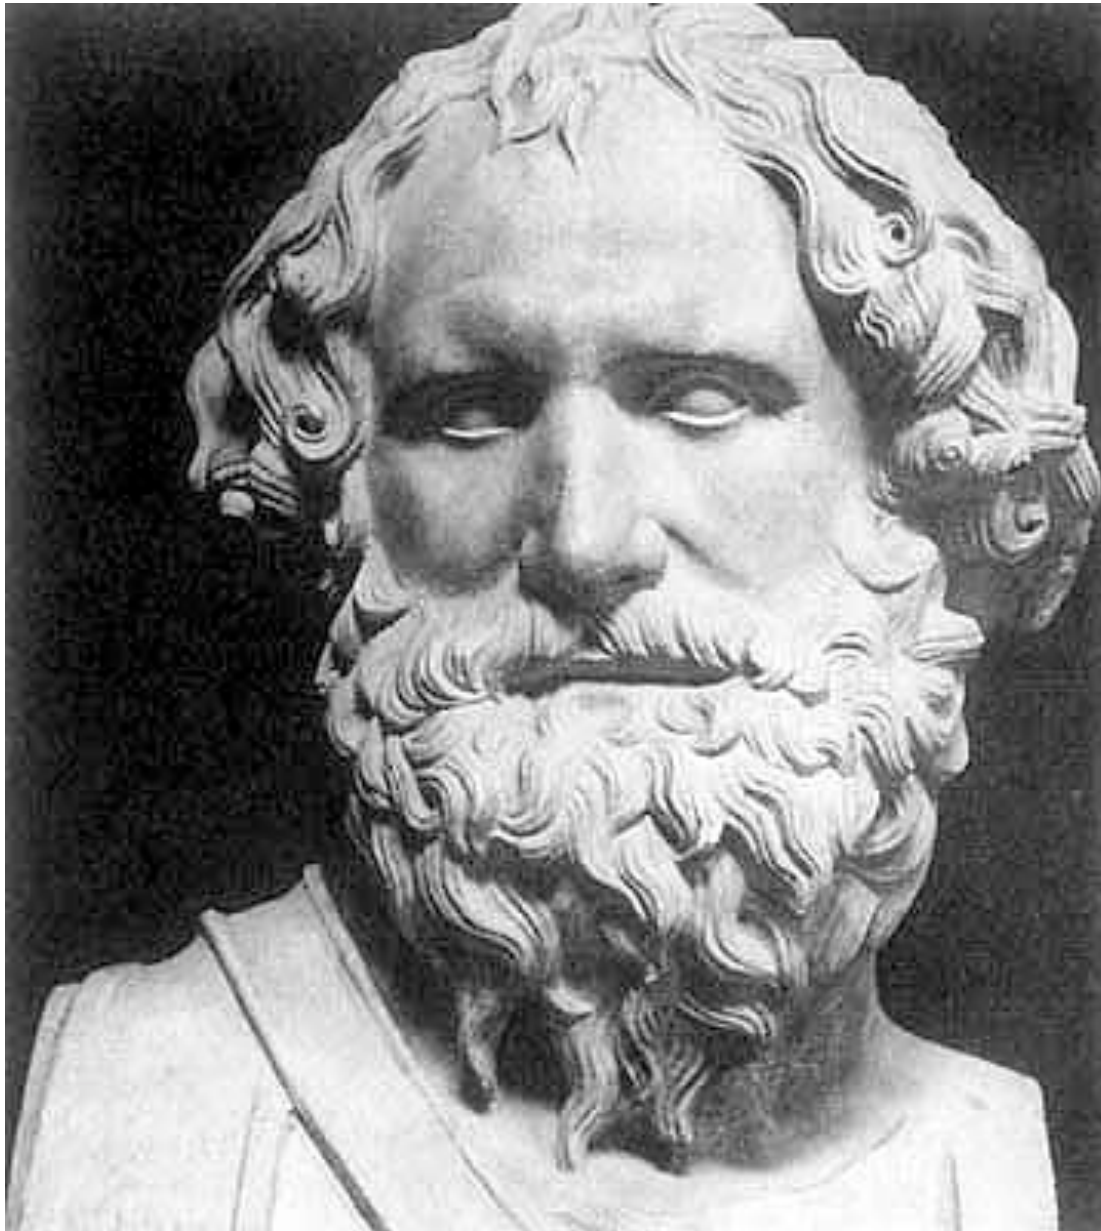

9b Protestors and Solutioneers join forces

so they have leverage to move
heavy objects ...

**As Archimedes
said:**

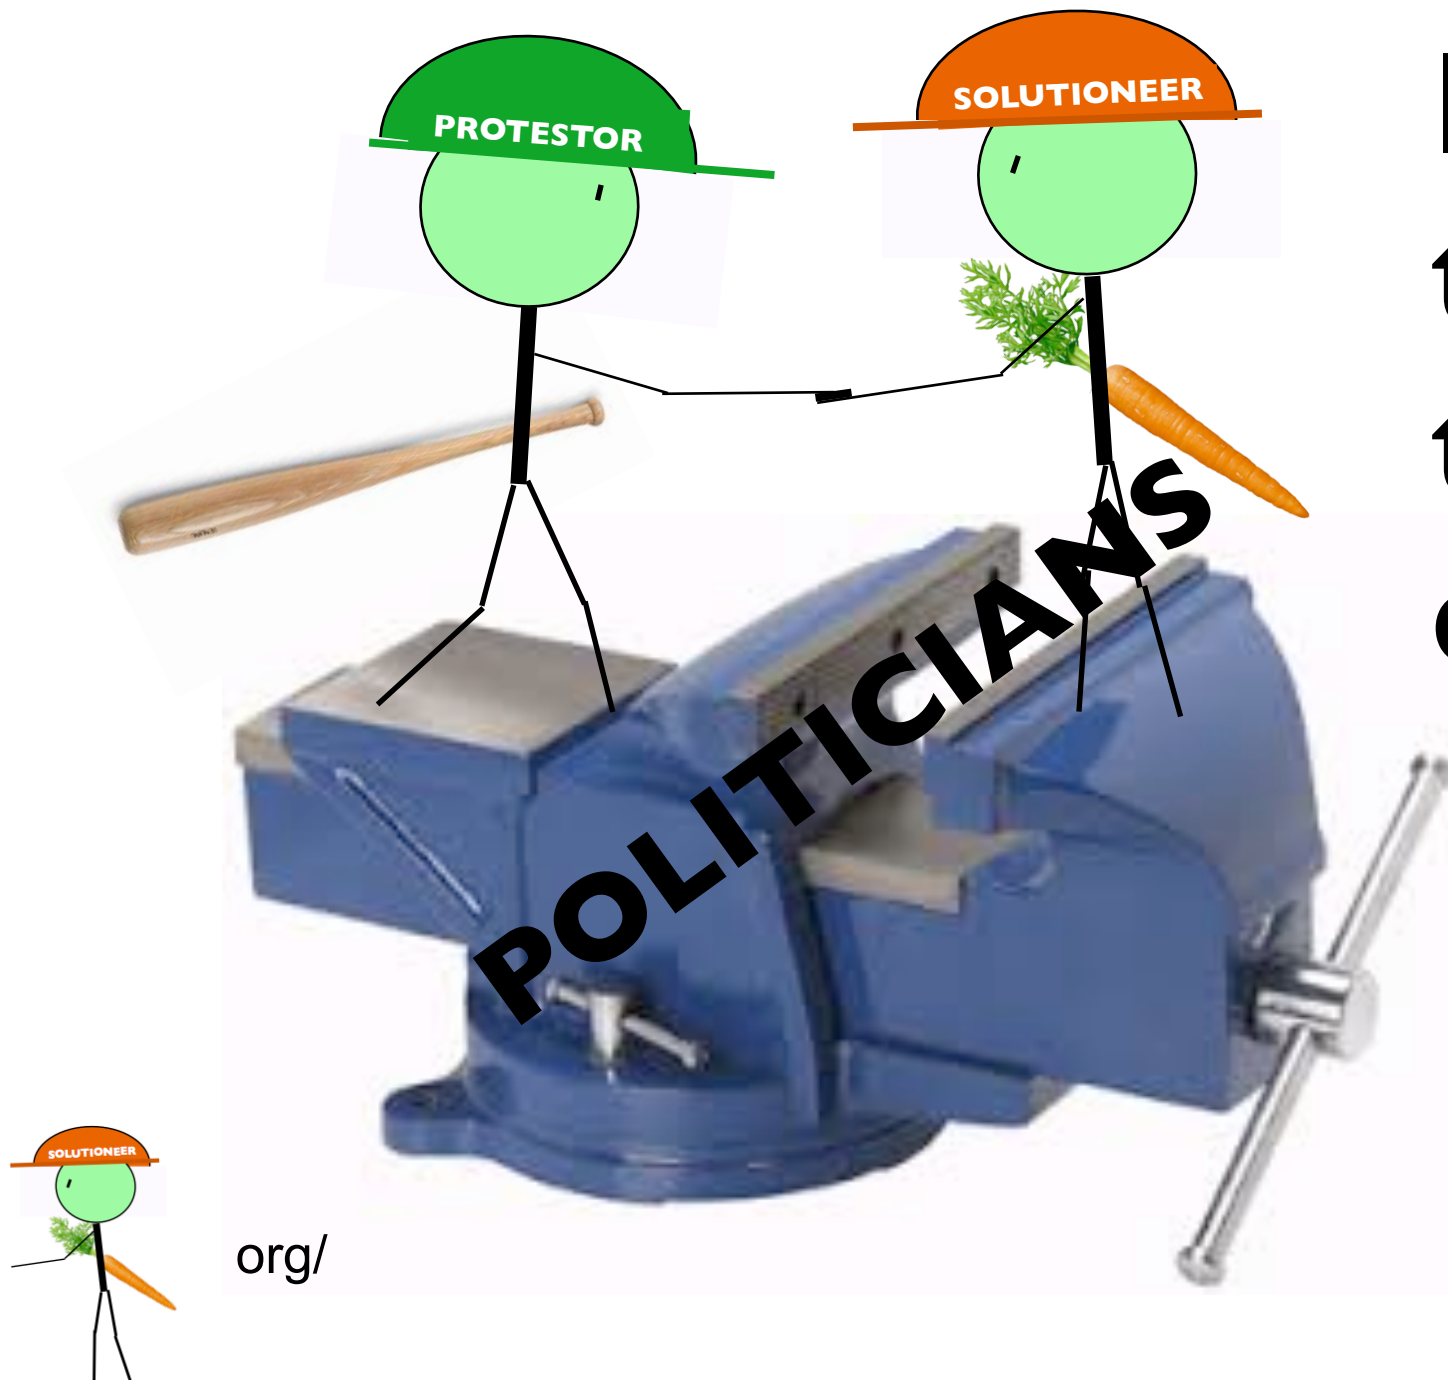

**“Give me a
place to
stand and
with a lever
I will move
the world.”**

Holigent.

10b

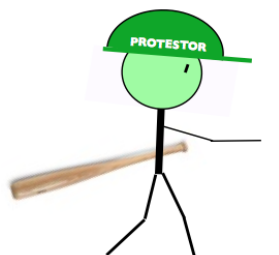

Your other tool is the vise.

**It must have
two jaws
to be
effective.**

WHO

will do it?

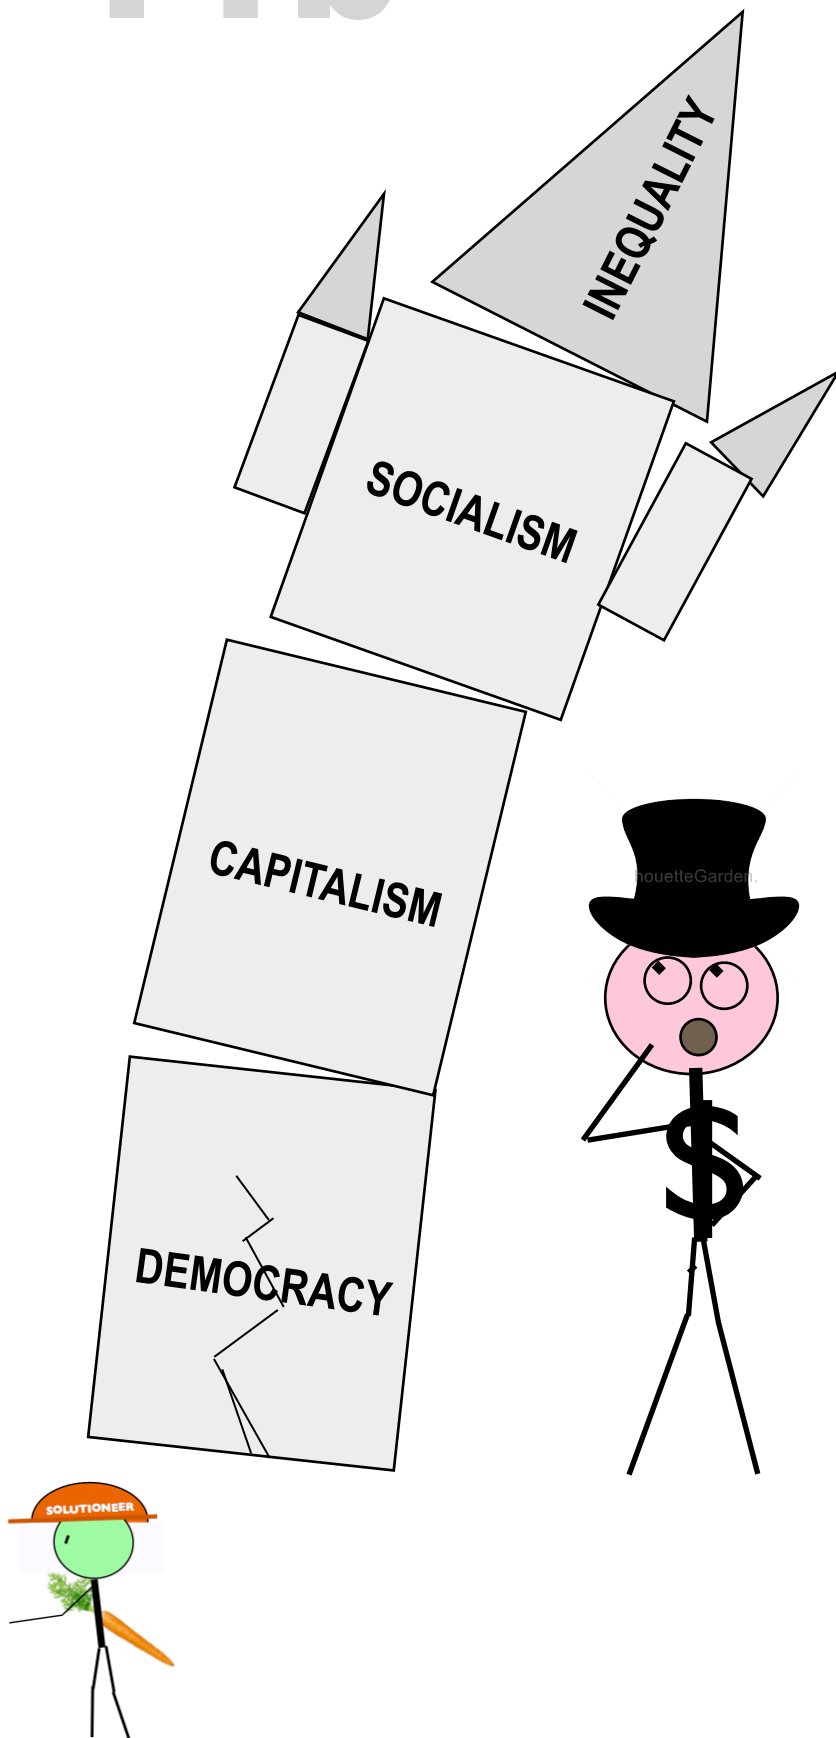

11b

Wealthy

individuals and corporations.

Because they have the means to initiate societal reconstruction to avoid collapse. They may consider this a long term investment that is part of their *life and wealth preservation portfolio.*

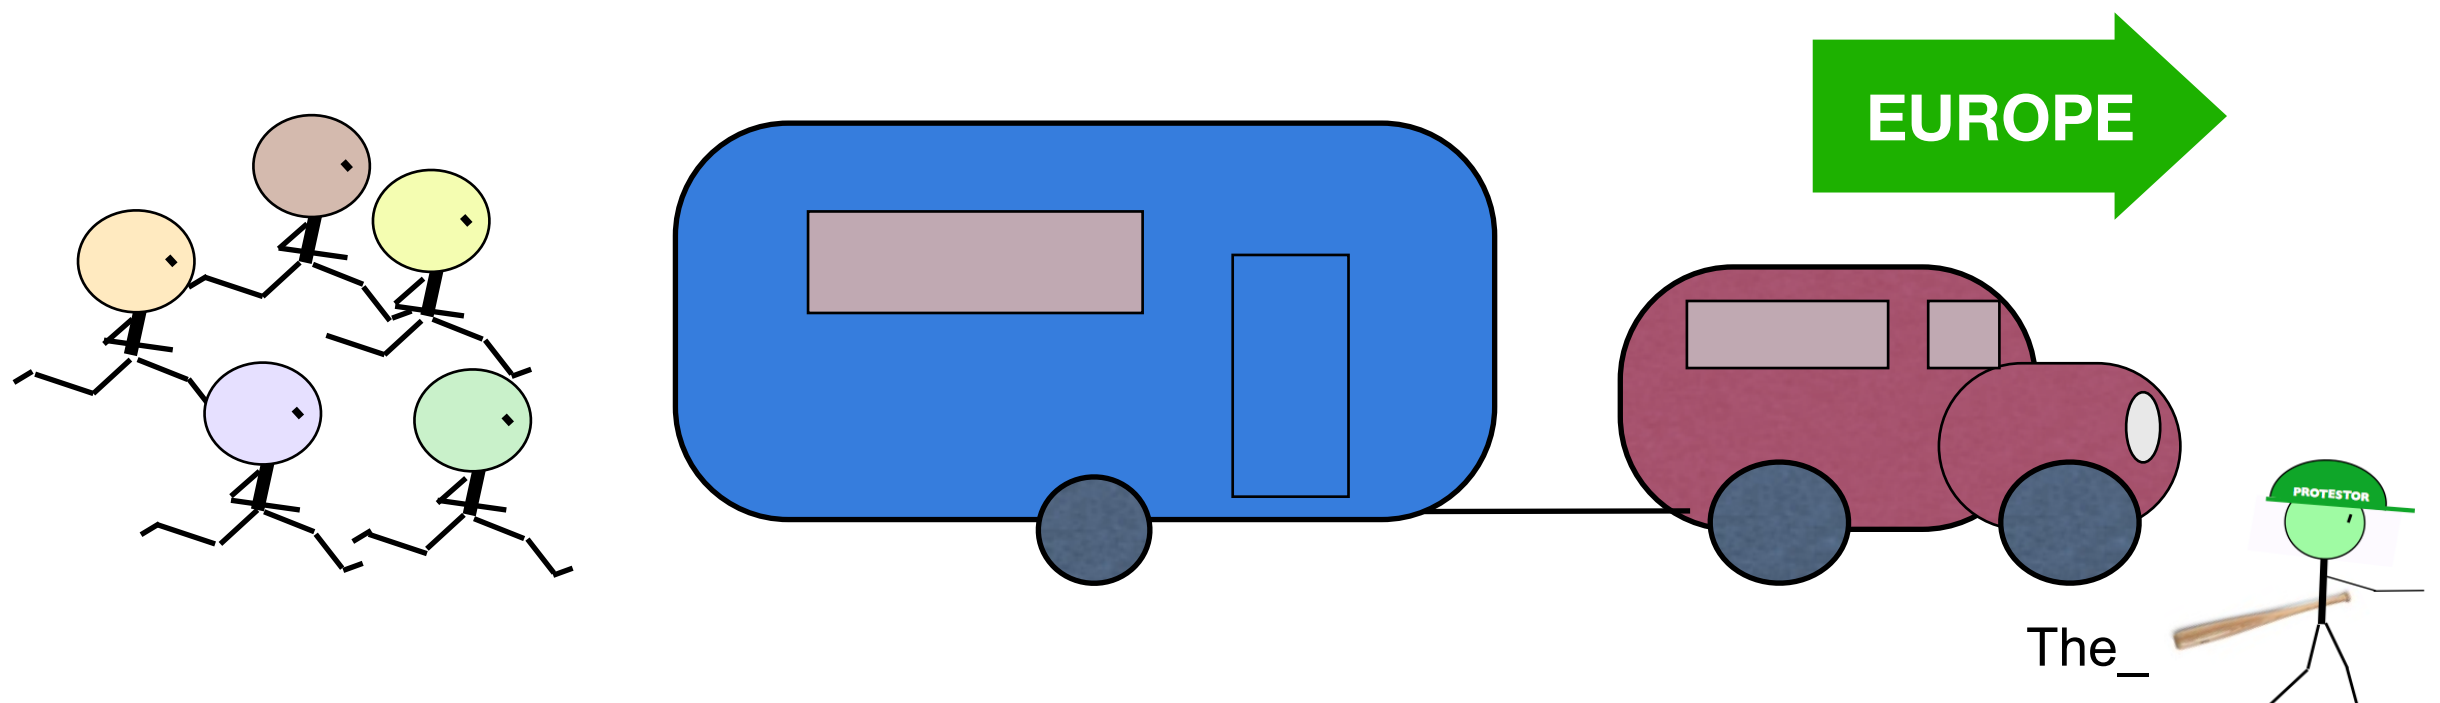

When

Billionaires

Plant the seed of peaceful sustainability,

Individuals will

Promote the project across Europe—then...

12b

Politicians

will participate so that

Future Generations

can harvest the fruits of

Peaceful

Systemic

Sustainability.

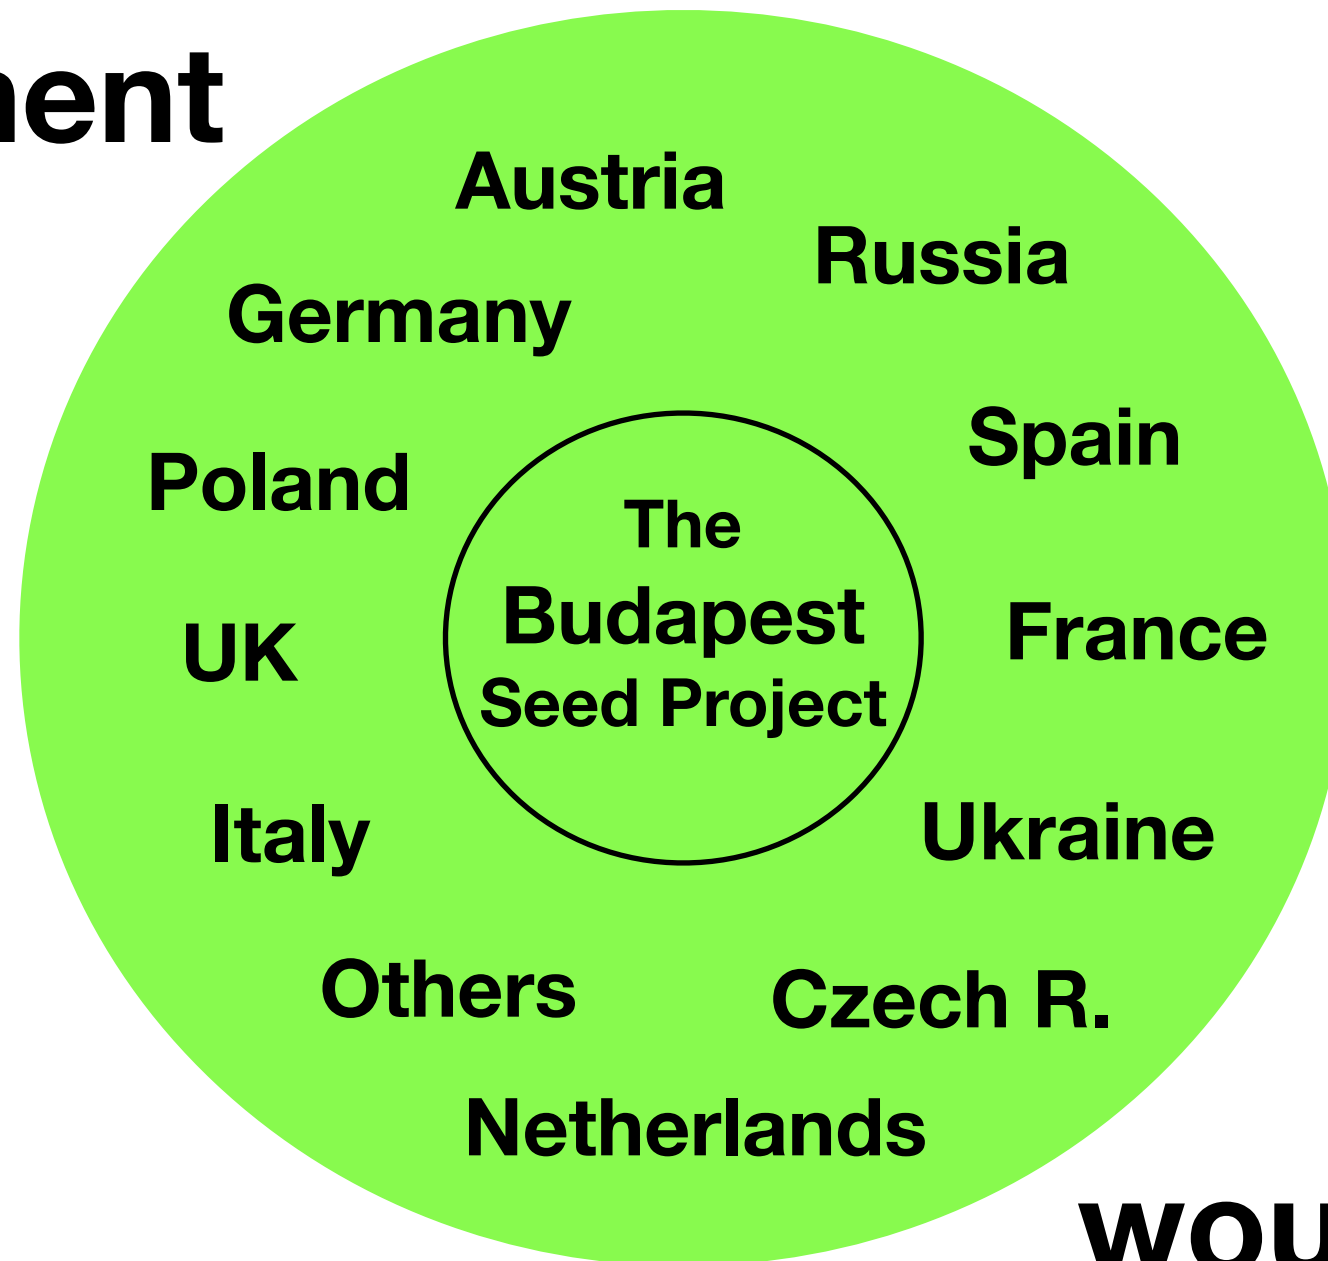

E-

WHERE?

13b

The center of the Continent

would be a
logical choice

When

European Nations

are invited to the proposed permanent
World Exhibit they may join building the

International

HOLIGENT CAMPUS

BUDAPEST

to learn, test and demonstrate their
best model for the pursuit of

Peaceful Systemic Sustainability.

Message.

14b

WHEN?

html

NOW!

Because changing society is subject to inertia. Today's living generation must urgently begin building a better bridge to the future before the window of opportunity closes for ever.

X

15b

**When successful,
the Continent will never again be the
flashpoint of World Wars, but rather,
Europe will be the
Birthplace and Nursery of
WORLD PEACE
and
Systemic Sustainability**

Instructions

Print the entire document on card stock.

In windy conditions have rocks ready to weight the cards.

A) Hand out all the cards among the players. Each card is identified by a Protestor or a Solutioneer. Players take on the identity of Protestor or Solutioneer depending on the card in hand.

B) Protestors and Solutioneers mingle to find their matches (“a” + “b”) and with a handshake form a cell of the Holigent Alliance. They then hold the cards in hand until all the matches are found.

C) When all matches are complete, place cards on the floor in a single line in numeric order.

D) When the big puzzle is complete from page 1 to page 30, each player reads aloud the caption of his/her card starting with page 1. Players to imagine that they are on stage, so they can loudly dramatize, even shout their lines.

E) In the completed puzzle, behind some of the Protestors and Solutioneers, are fractions of a web address. The complete web address is your key to liberate the message.

F) Open the message on your smart device and let someone read it out loud.

G) All the cards are collected at the end of each session.
